Application/Control Number: 09/960,680

Art Unit: 1713

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to an emulsion polymerization process, classified in class 524, subclass 714.
 - II. Claims 11-17, drawn to an emulsion product, classified in class 524, subclass 714.
 - III. Claims 18-20, drawn to a B-stage product, classified in class 524, subclass 847.
 - IV. Claims 21-22, drawn to a B-staging method, classified in class 524, subclass 847.
- 2. The inventions are distinct, each from the other because:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as the preparation of an emulsion

Application/Control Number: 09/960,680

Art Unit: 1713

product through blending of different existing emulsion products without having to prepare the emulsion from a polymerization process.

- 3. Inventions Group IV and Group III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as a different heating cycle.
- 4. Inventions Group I and Group IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by different process such as a process that uses hydrosilated dicyclopentadiene resins instead of the presently claimed B-stage resin system.
- 5. Inventions Group II and Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, Group II and Group III have

Application/Control Number: 09/960,680

Art Unit: 1713

different modes of operation, different functions, Group II is drawn to an emulsion product while Group III is drawn to a B-stage product.

- 6. Inventions Group I and Group IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, Group I and Group IV have different modes of operation, different functions, Group I is drawn to an emulsion polymerization process while Group IV is drawn to a B-staging process.
- 7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 8. A telephone call was made to Matthew Cairns (Registration No. 42,378) on September 28, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1713

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William K Cheung whose telephone number is (703) 305-0392. The examiner can normally be reached on Monday-Friday 9:00AM to 2:00PM; 4:00PM to 8:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David WU can be reached on (703) 308-2450. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.

William K. Cheung '

Patent Examiner
